Hello. My name is Ellen Schaffer, and I'm a resident of Concord. I am speaking tonight as a citizen of New Hampshire and more specifically of Concord. I do not want the Northern Pass at all, but because our neighbors in the south need more electricity, I'm willing to support a compromise as long as it is not at the expense of destroying the beauty and tranquility of our beautiful state and its capital city. This is what will happen if the line goes above ground or through the right-of-way. The destruction of so many trees and the humming of the lines will ruin the surrounding areas, especially in Concord which has the most new towers of any area. Seventy-seven new towers are scheduled to be built in Concord, destroying farmland, Turtle Pond, and passing way too close to homes. For this reason, it must be buried along roads and not in the right-of-way. When I heard Bill Quinlan’s comment that he wasn't hearing much opposition from people in central and southern New Hampshire, I contacted my neighbor, Sue Woodard, and who had a sign saying Stop Northern Pass in her yard, and we started the following Petition which states: support burying the Northern Pass Transmission lines through the entire state but especially through Concord where they will be in close proximity to many homes. We have gathered 1102 signature on this Petition and I have to say we only had maybe 2 or 3 dozen people in Concord that would not sign it in all the people we spoke to. So I would like to have this entered into the record. Thank you.
