

The Northern Pass EIS

PUBLIC COMMENT SHEET

If you would like to provide Comment on the Northern Pass Project to the Department of Energy (DOE), you can write your comment in the space below and return the sheet to a DOE representative at one of the sign-in tables at this meeting. You can also fill this Comment Sheet out at home and return it to Brian Mills, DOE, via mail or fax to the address posted below. Comments must be received before April 12, 2011 to be considered in the scoping process; comments received after this date will be considered to the extent practicable.

Name: FRED LAVIGNE

Address: 407 DIAMOND LEDGE RD.

City: CTR. SANDWICH State: N.H. Zip: 03227

Comment: PLEASE deny the Presidential Permit to Northern Pass!
This project has brought out the best in NH, citizen grassroots
against this unwanted destruction project. It is a shame
The U.S.F.S. has to spend valuable time on this not needed,
power scheme. IF This does continue please study how
construction would impact the daily lives of citizens, tourism, water,
soil, fungi, plants, forest cover, and social impacts over time.
Please study how much land would be impacted outside
the R.O.W to access the construction sites, ie. staging areas
for material and equipment new or reconstructed access roads.
Please study noise pollution from construction and effects
to resident people and wildlife. Please study how many
inspectors either federal or state it would take to assure
laws are followed and best construction practices followed to
protect water and wetlands. Please deny this permit
so the good people of NH. can get back to their lives
making a living, volunteering, growing gardens, helping neighbors and
N.H. such a fine place to live. sincerely, Fred Lavigne

Note: By Providing your name and address, it becomes public information and may be provided to individuals and organizations upon request under provisions of the Freedom of Information Act of 1974. Except for proprietary information, DOE will make all submissions from organizations or individuals available to the public in their entirety.
