**Subject:** SE Group Team - Northern Pass bat and wetlands follow-up

Mike,

The SE Group Team is in the process of preparing our spring/summer biological work plan. In follow up to our meeting a few weeks ago and the preliminary comments NHFG provided, we would appreciate any direction NHFG can provide on the level of effort for the bat habitat assessment/acoustic monitoring effort. I believe you were planning to discuss this with Emily Brunkhurst . Any guidance you can provide on the bat studies while we are still in the development stage of the work plan would be very helpful.

Additionally, do you think there is a contact at NH Department of Environmental Services who would be interested in reviewing the wetlands, streams, and vernal pools work plan? We have not had contact with anyone at that agency since our responsibility is not permit focused, but we think there would be value in including them in the review of the wetlands, streams, and vernal pools work plan component.

Thank you for any direction you can provide on either of these issues!

Regards,  
Courtney
