Subject: RE: Northern Pass T&E Meeting Summary - July 2014

Follow Up Flag: Follow up
Flag Status: Completed

Tony,

In addition to the meeting notes that I just sent to the larger group, we are also very interested in any follow-up you can provide on the results of the 2013 acoustic bat survey that we previously provided and discussed at the end of the July meeting.

Also, per our discussions during the July meeting, the SE Group Team completed the mobile acoustic bat surveys along the alternative project alignments using the protocol that we had previously provided to you, which included the SE Group Team driving the length of each alternative twice during the summer maternity season to collect acoustic data to determine the presence/probable absence of the federally listed Indiana bat and proposed listed northern long-eared bat within the alternatives.

If you have any updates to share on these issues please let me know and we can set up a conference call to discuss.

Thanks,
Courtney

Subject: Northern Pass T&E Meeting Summary - July 2014

All,

Attached please find a summary from our July 23, 2014 meeting in Concord to discuss threatened and endangered species issues associated with the Northern Pass Transmission project. Please review the meeting summary and provide me with any edits that you may have. After feedback has been received I will finalize the meeting summary and redistribute for everyone's records.

Thanks,
Courtney
