Mr. Chapman:
Greetings and salutations.

I have resent the attached letter to you in hopes that we can resolve what seems to be a break in communications.

In the letter we discussed the USFWS request that DOE include the data related to listed bat species collected by NPT contractors in our BA.

DOE stipulated that these data could be included if they were formally evaluated and accepted by USFWS.

Has USFWS evaluated the subject data and is said data acceptable to USFWS?

Thanking you in advance for your expeditious reply.
